To Whom It May Concern

Re: CALIFORNIA PROPOSITION 65 DECLARATION

Dear Madam or Sir:

IPM is fully committed to providing safe products. Based on our knowledge of our products, **carbon black, crystalline silica and titanium dioxide** have been the primary concern with respect to Proposition 65. However, IPM cannot test every piece it ships and has not tested its products for every one of the approximately 900 chemicals on the Proposition 65 list.

We have determined to use “safe harbor” warning methods and statements established in State of California regulations. The warning will appear on a label or other labeling affixed to or accompanying the product, the product container, or wrapper. The label would read as follows:

**WARNING:** *This product can expose you to chemicals including carbon black, crystalline silica and titanium dioxide], which are known to the State of California to cause cancer and birth defects or other reproductive harm.*

If you have specific questions or would like your product to contain this warning please contact IPM at 1-800-942-7538 for customer service.

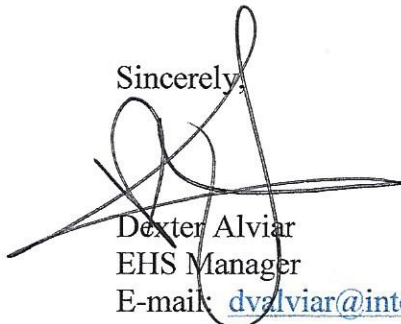

It is important for you to make your own evaluations of Proposition 65 and other safety requirements to determine the most appropriate course based on your particular situation.

For more information on Proposition 65 you can consult the OEHHA web site at:

<http://oehha.ca.gov/Prop65/background/p65plain.html>

We trust this information is satisfactory to your needs. Should you have any questions, please feel free to contact me.

Sincerely,

Dexter Alviar  
EHS Manager
